

VidyoMobile™

Video collaboration on hand-held devices

Enjoy the freedom to connect and collaborate easily with others across a wide range of endpoints from smartphones to multi-screen room solutions.

The VidyoMobile™ app brings high-quality video conferencing to popular Apple and Android tablets and smartphones. Now you can host a person-to-person or multi-party video conference from your office, home, or on the road, on both wireless broadband and WiFi connections. As a full-featured endpoint in your VidyoConferencing™ solution, VidyoMobile delivers transcode-free video conferencing for natural communication at the pace of conversation, without the broken pictures associated with traditional solutions.

Key Features

iOS Version 1.5
Android Version 2.1

VidyoMobile Highlights

- Join and host meetings from your smartphone or tablet running Android or Apple iOS
- Automatic and adaptive encoding modes up to 720p for optimal quality and efficiency
- Just tap a conference link in any email, message, or appointment to join a conference
- Share what you see by switching between front and rear-facing cameras on the fly

Rich In-Conference Experience

- Make any participant or content share bigger with pinch-to-zoom and real-time panning
- Far-end camera control (FECC) of remote VidyoRoom systems
- Conference with participants on room systems, desktops, laptops, tablets, and smartphones
- Customizable layout with up to 4 onscreen participants

Exclusive Vidyo Technology

- Multipoint Content Sharing: toggle to switch between content shares from multiple participants
- Extreme Definition (XD) displays up to 3 megapixel resolution for shared content
- Dynamic adaptation technologies optimize performance over wireless networks

Easy to Own and Secure

- Full functionality on both WiFi and 4G networks, sustaining conferences on variable links with up to 20% packet loss
- No recurring per-month or per-user fees
- Perpetual floating VidyoLine™ licenses maximize utilization and keep costs down
- Automatic NAT and firewall traversal
- Interoperate with legacy endpoints via the Vidyo infrastructure or through the free VidyoWay™ interconnectivity service

Specifications

VidyoMobile™	
Video	
Native Video Codec	H.264 SVC (UCIF Mode 2s)
Video Encoding	iPhone 5S / 5 / iPad 4 / iPad Mini 2 / iPad Air: up to 720p15 (may send lower res) iPhone 4 / 4S / 5C / iPad 2-3 / iPad Mini: up to 360p15
